CHOCOLATE
EXTRUDER

This machine, consisting of four aligners, is located between the extruder and the coating belt and optimises the productive capacity of the line. By making use of an oscillatory motion with adjustable steps the product is sorted into lines, transported towards the coating zone and subsequent cooling in the tunnel. It should be noted that the entire process is automated and does not require the manual input of the operator, hence avoiding damage to the previously extruded product.

Technical data

Electrical specifications : 230 V single phase
50-60 Hz

Power required: 0,4 Kw - 16 A - 3 poles

Hourly production rate (estimated): 40-50 Kg
(it supports the hourly production of the Chocoform)

Dimensions: h. 1230 mm, w. 860 mm, d. 760 mm
